

SPOT YOUR OCCUPATION?

Absorption science, Acoustics, Aero/Safety Engineering, Aerodynamics, Aerodynamics & Computational Fluid Dynamics, Aeronautical engineering, Aeronautical Research, Aerospace Engineering, Aerosystems, Agricultural ecology, Agricultural processing, Agricultural Science, Agriculture, Agrochemical chemistry, Agronomy, Air pollution, Air quality, Air quality dispersion, Air quality emergency response, Air safety investigation, Air surveillance systems, Air Systems, Air Transport, Aircraft avionic engineering, Aircraft avionic systems, Aircraft component parts and assembly, Aircraft engineering, Aircraft maintenance, Aircraft mechanical structures, Aircraft propulsion systems, Aircraft simulators and synthetic trainers, Aircraft systems and structural airworthiness, Airframe technician, Alternative energy, Ammunition and explosive technology, Amphibian pathology, Analysis of radioactive materials, Analytical chemistry, Analytical Polymer Chemistry, Analytical science, Animal and public health, Animal behaviour, Animal disease diagnostics, Animal disease surveillance, Animal nutrition, Animal population and disease informatics, Animal tuberculosis vaccine and diagnostics research, Animal welfare, Applied Chemistry, Applied Geology - drilling, mining and processing, Applied hydrobiology, water supply and distribution, water pollution., Applied Mathematics, Applied physics, Applied psychology, Applied sciences, Applied Statistics, Arboriculture, Armament and explosives engineering, Armour materials and systems, Artificial intelligence, Assisted reproduction and embryology policy, Astronomy, Astrophysics, Atmospheric Chemistry, Atmospheric composition and air quality modelling, Atmospheric dispersion, Atmospheric physics, Atmospheric science, Atmospheric turbulence and dispersion, Atomic and laser physics, Atomic physics and acoustics, Atomic spectroscopy, Auditing systems, Automotive Engineering, Automotive gearing, Automotive Human Machine Interfacing, Automotive Safety, Aviation Engineering, Aviation Safety, Avionic design, commissioning and procurement, Avionic engineering, Avionics Education, Bacterial genetics, Bacterial pathogenesis and detection, Bacteriology, Ballistics, Battle Modelling, Beekeeping, Behavioural Ecology, Behavioural pharmacology, Behavioural science, Bilateral Science and Innovation Policy, Biochemical engineering/life sciences, Biochemistry, Biodiversity, Bio-energy, Biofuels, Bioinformatics, Biological mass spectrometry, Biological pharmaceutical products, Biomarker safety, Biomechanical engineering, Biomechanics, Biomedical engineering, Biomedical ethics, Biomedical Physics, Biomedical research, Biometeorology, Biometrics, Biopharmacology, Biophysics, Biotechnology, Bivalve shellfish hygiene, Botany, Bovine TB immunology - vaccine development, Bovine TB scientific advice to policy makers, Bovine Tuberculosis research, Brain electrophysiology, Broadcast meteorology, Broadcast Systems, Building defects, performance, standards, and sustainability, Building regulations and standards, Building services engineering, Calibration, Canine olfaction, Carbon capture and storage, Cathodic protection, CBRN Hazard Assessment, CBRN Mathematical Modelling, CBRN Physical Protection Science, CBRN Radiation recover, CBRN science, CBRN weapon systems, Cell biology, Chemical analysis, Chemical and biological agent detection, Chemical biology, Chemical ecology/entomology, Chemical engineering, Chemical physics, Chemical regulation, Chemical warfare agents - detection and decontamination, Chemical/biological counter terrorist technologies, Civil engineering, Civil engineering - sustainable concrete, Civil engineering in the railway environment, Civil engineering, highways maintenance, Civil engineering, predominantly tunnelling, underground excavation, underground railways, Civil Engineering with a specialism on extreme hazard loading, Clean technology, Climate change adaptation, Climate change policy, Climate impacts modelling, Climate research, Climate sciences, Climatology, Clinical chemistry: in-vitro diagnostic devices and their regulation, Cloud physics, Coastal and marine sedimentary dynamics, esp. assessment of human impacts, Coastal engineering, Cognitive neuroscience, Cognitive science, Combat modelling, Combat Systems and Nuclear Disposal, Combat Systems Software Engineering, Communicating meteorological hazard/risks, Communication and information systems, Communication security, Communication systems engineering, Communications and electronics, Communications engineering, Comparative pathology, Complex weapons, Computational chemistry, Computational modelling, Computational physics, Computer aided design and production engineering, Computer engineering, Computer network operations, Computer programming, Computer science, Computing infrastructure design, Condensed matter physics, Conservation, Construction safety engineering, Construction technology, Contaminated land management, Corrosion science, Cost engineering, Cost forecasting, Counter terrorism, Counter-proliferation, Counter IED, Crop genetics and ecology, Crop protection, Cryptography, Crystallographic analysis, Data analysis, Data assimilation for climate science, Data collection, Database programming, Decontamination sciences, Defence acquisition, Defence aerospace equipment procurement, Defence electronics, Defence engineering, Defence operational research, Defence supportability engineering, Defence technology, Defence weapons engineering, Demography and migration, Explosives safety, Diagnostic development, Dialysis, Diet and nutrition, Dietetics, Digital communications, Digital electronics, Directed energy weapons, Disease containment, Disease diagnostics, Dismounted technology, DNA database, DNA methodology, DNA technology, Drinking water quality, Drinking water treatment, Drugs, Dynamoelectric machine development, Earth sciences,
